

Description of post production sound studio

Post production sound studio is among the best sound recording studios in Latvia. Studio has over 10 years of experience in providing high quality audio applications for TV/Radio/Multimedia. Studio profile is mostly advertising productions, but also sound engineers has experience various documentary films sound direction and producing.

The main advantage of post production studio is two acoustically treated control/editing rooms (Room A and Room B) arranged in parallel and one recording booth. Room A has recording capability, and functions as an edit suite, while room B is intended to be used as a parallel edit suite. Room A has a variety of classical and modern sound processing equipment. Recordings are made with Neumann CMV 563 (with capsule M9) and Sennheiser MKH416. Video playback for talent and engineer is provided via Blackmagic Design Decklink Pro.
